ACADEMIC PROJECT 2 (MULTIMEDIA) COMMITTEE 2025

Dr. Harryizman Harun – Chair
Prof. Ts. Dr. Sobihatun Nur Abdul Salam
Dr. Ruziana binti Mohamad Rasli
Dr. Norhana binti Yusof
Assoc. Prof. Ts. Dr. Subashini Annamalai
Ts Dr. Azliza binti Othman
Dr. Azizah binti Che Omar

Requests for permission to copy or make other use of materials in this booklet, in whole or in part, should be addressed to: SCHOOL OF MULTIMEDIA TECHNOLOGY & COMMUNICATION, UUM CAS.

Views, opinions, conclusions or other information contained in this booklet is not related to the business of UNIVERSITI UTARA MALAYSIA and shall not be taken as reflective of or endorsed by it.

1. OVERVIEW

Academic Project 2 (AP2) focuses on the design, development, and evaluation of multimedia prototypes, guiding students through the complete process of multimedia project development. Students will construct a fully functional multimedia prototype, integrating technical and creative elements. This course emphasized on professional communication and presentation skills, with students demonstrating their prototypes in an exhibition setting and documenting their research or development process in a scholarly article. Throughout the course, students will also explore the importance of ethics and professionalism in multimedia research and project development, ensuring adherence to best practices.

Pre-requisite: Academic Project 1

2. COURSE LEARNING OUTCOMES

Upon successful completion of the AP2, students will be able to:

CLO1 – Construct a fully functional multimedia prototype (P3, LOC3a).

CLO2 – Evaluate the developed multimedia prototype (C5, LOC2).

CLO3 – Demonstrate the fully functional prototype in an exhibition (A3, LOC3c).

CLO4 – Write scholarly article in communicating the multimedia research or project development (C6, LOC2).

CLO5 – Integrate ethics and professionalism in performing multimedia research or project development (A4, LOC5).

3. SUPERVISION

The assigned supervisor from AP1 will continue to provide guidance throughout the project.

The role of the supervisor includes:

i. offering expertise and feedback on the concepts and creative aspects of the project.

ii. monitoring the students' progress and ensuring that project milestones are met.

iii. facilitating students to develop, evaluate, demonstrate and documenting the project.

iv. meeting the students at least **SEVEN (7)** times each semester to discuss progress and provide constructive feedback.

The role of the student includes:

i. design and create multimedia content like text, graphics, audio, video, and animations, ensuring it looks good and works well.
ii. use any multimedia tools to edit and implement content, making sure it functions without error.
iii. evaluate the project formatively and summatively.
iv. prepare scholarly article summarizing the development process, challenges, and solutions, and ensure the project is delivered on time.
v. prepare for project exhibition.
vi. meeting the supervisor at least **SEVEN (7)** times each semester to discuss research / project progress.

4. ASSESSMENT ITEMS

The assessment of the AP2 project will be based on several key components, as listed in Figure 1:

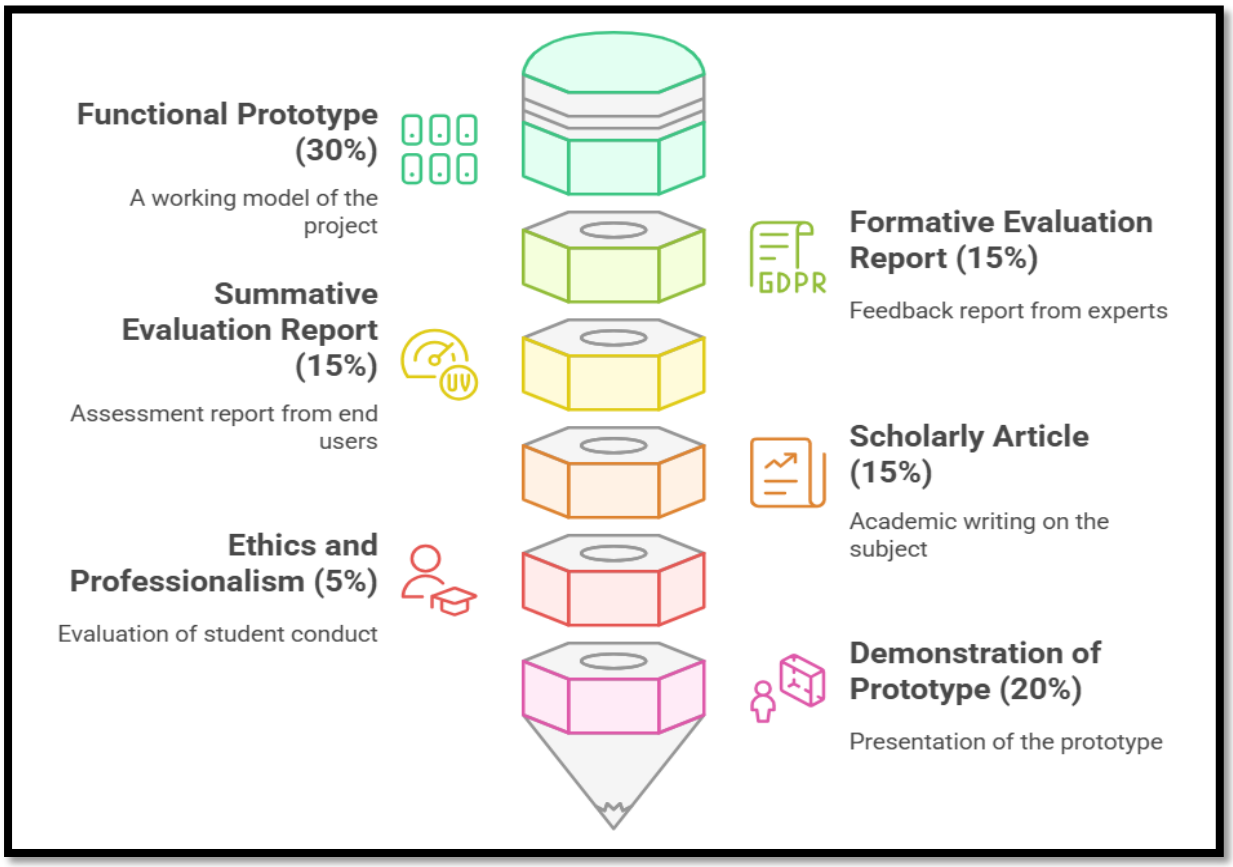

Figure 1

Project Evaluation Breakdown

Part A: Supervisor (80%)

i. **Fully functional prototype** (30%): A full functional prototype must be presented to the supervisor. (CLO1, P3, LOC3a)
ii. **Formative evaluation report** (15%) - A type of evaluation conducted with the multimedia and subject matter experts during the development or implementation phase of a project, program, or product, with the purpose of providing feedback for improvement (CLO2, C5, LOC2)
iii. **Summative evaluation report** (15%) - A type of evaluation conducted with the real users at the end of a project, program, or product development to assess its overall effectiveness, impact, and success. (CLO2, C5, LOC2)
iv. **Scholarly Article** (15%) - A piece of academic writing that presents original research, analysis, or review on a specific subject within a particular field of study. (CLO4 C6, LOC2)
v. **Student's ethics and professionalism** (5%) - An evaluation by the supervisor based on the student's engagement, effort, and progress throughout the project. (CLO5, A4,LOC5)

Part B: Assessor (20%)

i. **Demonstration of the prototype** (20%) – Consists of the following components:

- ✓ **Product** (10%) (CLO1, P3, LOC3a)
- ✓ **Poster** (5%) (CLO3, A3, LOC3c)
- ✓ **Presentation** (5%) (CLO3,A4, LOC3c)

5. COURSE ACTIVITIES

Table 1

Course Activities

Week	CLO	Activity	Action Required	Remarks
Before semester begin		Pre-briefing on Academic Project 2 (AP2)	**AP Committee:** Manage AP2 exhibition **Student:** N/A	
1	1, 5	Briefing on Academic Project 2 (AP2)	**AP Committee:** Provide briefing on the project development, evaluation, exhibition and scholarly article. **Supervisor:** Attend the briefing. **Student:** Compulsory to attend the briefing.	Briefing session: Week 12 of previous semester
2	1, 5	Meeting with supervisor – project development	**Supervisor:** Discuss the information related to the project development. Provide constructive feedback to the students. **Student:** Discuss in detail on the project development. Prepare a high-fidelity prototype.	
3 - 4	2	Meeting with supervisor – project evaluation.	**Supervisor:** Monitor student progress and provide feedback on the project evaluation (Formative). **Student:** Meet with client and experts. Write formative evaluation report.	Formative evaluation report.
5 – 8	1 (1 week), 2, (1 week)	Meeting with supervisor – project development	**Supervisor** Monitor student progress on project development based on formative feedback.	Amended project development.

		revision / amendment.	**Student** Meet with supervisor and discuss on their progress. Make amendment on the formative evaluation feedback	
9 – 10	2, 5 (2 week)	Meeting with supervisor – project evaluation.	**Supervisor:** Monitor student progress and provide feedback on the project evaluation (Summative) **Student:** Meet with client or users. Meet with supervisor and discuss on their progress. Write summative evaluation report. Prepare for the scholarly article.	Summative evaluation report.
11 – 12	2, 3, 5	Meeting with supervisor – exhibition preparation	**Supervisor** Monitor student progress on exhibition preparation. **Student** Meet with supervisor and discuss on their progress. Prepare for the project exhibition (Project poster, fully functional prototype and booth decoration). Rehearse for project demonstration.	Fully functional prototype Project poster
13	3, 5	Exhibition day	**Supervisor** Prepare the student for the exhibition. **Student** Present the project during the exhibition day.	Exhibition checklists (Laptop, extension, poster, headphones, tablecloth, brochures and booth decorations related to the projects).
14	4, 5	Scholarly article submission	**Supervisor** Assess student ethics and professionalism throughout the supervision process. **Student**	Scholarly article – a writeup of a combination of formative and summative evaluation report.

			Submit scholarly article	

6. EVALUATION GUIDELINES FOR MULTIMEDIA PROJECT

Students are required to conduct both **formative** and **summative** evaluations to ensure their multimedia projects meet user needs, are technically sound, and achieve the intended learning or functional objectives. Below are the guidelines for each evaluation stage, along with suggested methods, instruments, participants, procedures, dimensions and data analysis approaches. Use this guideline along with the formative and summative evaluation rubrics and documentation templates.

A. FORMATIVE EVALUATION (WEEK 3-4)

Purpose:

To refine and improve the multimedia prototype during development by gathering feedback from multimedia and subject matter experts / clients, focusing on the interface design and content relevance.

1. Engage Multimedia and subject matter experts / clients

- **Multimedia Experts:** Evaluate the usability, navigation, design consistency, and overall user experience and etc.
- **Subject Matter Experts / clients:** Review the content for accuracy, relevance, and effectiveness in conveying the intended message.
- The minimum number of experts is 3.

2. Methods for Formative Evaluation (Choose one)

- **Interviews**

  Conduct structured or semi-structured interviews with multimedia and subject matter experts to gather in-depth feedback. The experts must use the product before the interview begins. These interviews can cover specific aspects such as design, functionality, and content relevance.

- **Heuristic Evaluation**:

  Interface experts assess the project based on established usability principles (e.g., Nielsen's heuristics). Feedback is given on issues such as user control, consistency, and error prevention.

- **Cognitive Walkthrough**:

  Experts walkthrough the user interface as if they were users, identifying usability challenges and areas for improvement.

- **Expert Reviews**:
  Subject matter experts review the content to ensure its accuracy, appropriateness, and alignment with project objectives. This can be done through content-focused interviews or questionnaires.

3. Data Analysis

1) Qualitative Analysis:

Summarize the feedback from interviews, think-aloud protocols, and observations. Identify recurring themes or key points, such as common usability challenges or content inaccuracies. Highlight major recommendations from the experts to refine the prototype.

- *Example*: Categorize feedback into thematic areas like "usability," "content clarity," and "visual appeal."

2) Quantitative Analysis:

If questionnaires or checklists are used, calculate the frequency or percentage of responses to specific usability or content-related questions.

- *Example*: "80% of experts found the navigation system unclear," or "90% agreed that the content was accurate."

B. SUMMATIVE EVALUATION (WEEK 5-8)

Purpose:
To evaluate the effectiveness, usability, and overall performance of the finalized multimedia project by testing it with real users.

1. Engage Real Users

- **Target Audience**: Select representative users who match the profile of the project's intended audience. For quantitative, the minimum number of respondents is 30 while for qualitative, the minimum number of respondents between 5 to 10 with justification.

2. Methods for Summative Evaluation (Choose one)

- **Interviews**

Conduct structured or semi-structured interviews with real users to obtain their feedback. The users must use the product before the interview begins. These interviews can cover specific aspects such as usability, user experience, functionality, and content relevance.

- **Usability Testing**

  Have users complete specific tasks using the multimedia prototype. Measure task completion rates, time on task, and error rates.

- **Surveys**
  After testing, ask users to fill out questionnaires that assess their satisfaction, perceived usability, and the overall experience.

- **Focus Groups**
  Conduct group discussions with users after testing to gather detailed feedback on their impressions, thoughts, and suggestions.

3. Data Analysis

a) Qualitative Analysis

Summarize the feedback from interviews, think-aloud protocols, and observations. Identify recurring themes or key points, such as common usability challenges or content inaccuracies. Highlight major recommendations from the experts to refine the prototype.

- *Example*: Categorize feedback into thematic areas like "usability," "content clarity," and "visual appeal."

b) Quantitative Analysis

If questionnaires or checklists are used, calculate the frequency or percentage of responses to specific usability or content-related questions.

- *Example*: "80% of experts found the navigation system unclear," or "90% agreed that the content was accurate."

General Tips for Both Evaluations

- **Recruit a diverse set of experts and users** to gather a wide range of feedback.
- **Document all feedback carefully**, noting both the positive aspects and areas that need improvement.

- **Iterate**: Use formative evaluation to refine the project before summative evaluation and apply summative feedback for future versions or iterations.
- **Ethics**: Ensure informed consent from all participants and maintain confidentiality where necessary.

By following these guidelines for both formative and summative evaluations, students will be able to improve their multimedia projects, ensuring they meet usability standards and fulfil the intended purpose for the target audience.

7. GENERAL GUIDELINES FOR WRITING A SCHOLARLY ARTICLE

Here are general guidelines for writing a scholarly article, however, students should adhere to the specific article format required by the target journal. Use this guideline along with the formative and summative evaluation rubrics and documentation templates.

Enter Your Chapter Title Here

Julian C. Author[1], Dick F. Author[2], Anne Author[3], and Georgina J. T. Author[1]

The chapter title should be specific, informative, and brief. Where appropriate it should also be aligned with the style of other chapters in the section and/or volume.

- Use Title Case
- Do not use abbreviations or acronyms unless they are defined

Authors are individuals who have significantly contributed to the research and preparation of the chapter.

- Use full first names, not initials
- Separate authors by commas
- Use superscript numbers to link affiliations

[1]Affiliation for author 1 (e.g. Department of Advanced Research, University of Nowhere, Sometown, Virgina, USA)
[2]Affiliation for author 2 (e.g. Center for Earth Science, Institute of Advanced Study, Noplace, United Kingdom)
[3]Affiliation for author 3 (e.g. Research Division, Science Corporation, Big City, Japan)

- Superscript numbers correspond to the author list above
- Provide name of department/institute/center, university/institute/company, city and country

Abstract

The abstract should summarize the subject matter and its significance, the nature of the investigation and methodology, the main findings and conclusions.

- Abstracts are required for all chapters in edited books
- Present the abstract as a single paragraph
- It should be fewer than 200 words
- Avoid acronyms or else define them
- Avoid citations

1.0 Introduction

The main text should start with an introduction

2.0 First section

- The text should be divided into sections, each with its own heading
- Sections are numbered with Arabic numerals (1, 2, 3, etc.)
- Headings should be sentence fragments

2.1 A subhead

2.2 Another subhead

2.2.1 Detail about this topic
2.2.2 Even more detail

- A maximum of three levels of heads may be used (e.g. **1**, **1.1** and **1.1.1** but not **1.1.1.1**)

3.0 Second section

4.0 Third section

Tables And Figures

Tables and figures should be placed immediately after the paragraph in which they are mentioned. All figures should be in high resolution and readable. Authors are encouraged to submit the original format and file of the figures if they are created using other software. Number tables consecutively and use table numbers when referencing a table (Table 1, Table 2, 3...). Use uppercase and lowercase letters for the title of the tables, as shown here. The table caption must briefly explain the contents of the table. Round off to two decimal digits of accuracy while reporting correlations, proportions, and inferential statistics such as t, F, and x2. The table and figure should be in a Word document, not an image.

Table 1
Sample of Transformed Rainfall Data

Rainfall data	Normalised classes	Linguistic variable	Fuzzy discretisation
172.10	0.08	Very low	1
173.33	0.13	Very low	1
175.88	0.24	Very low	1
176.15	0.25	Low	2
178.54	0.35	Low	2
181.65	0.49	Moderate	3
183.19	0.55	Moderate	3

Place and label figure captions below each figure in sentence case letters. Use appropriate colours or shades for the chart. See Figure 1 for an example.

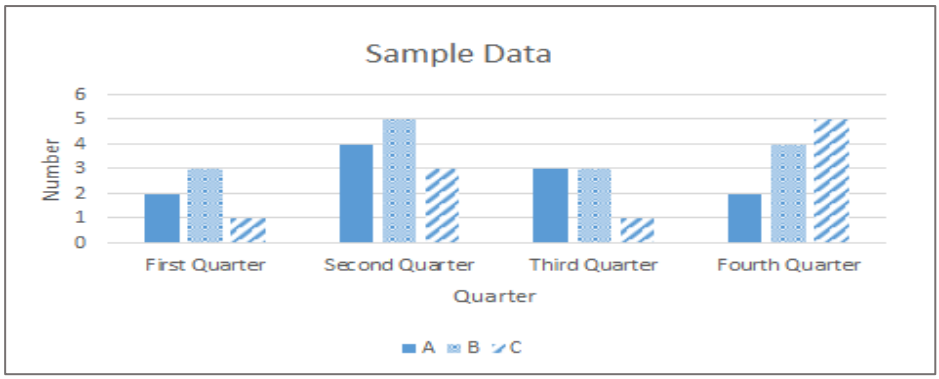

Figure 1

An Example of a Chart Represented in A Shaded Pattern

In text style/citation

- Footnotes – Do not use footnotes; incorporate all information into the text
- Reference citations - Use name-date format, not numbered references, and enclose citations in parentheses, e.g. (Zhu et al., 2016) or Zhu et al. (2009).

Acknowledgments

It is strongly recommended that you include a short paragraph with any acknowledgements. Acknowledgements may include recognition of funding sources related to the work and an expression of thanks to contributors, reviewers, and colleagues.

- When mentioning people do not include honorifics (such as Dr) but rather use first name or initial and last name.

References

All sources cited in text, tables, figures must appear in the main reference list, and all entries in the reference list must be cited in main text.

- References is using American Psychological Association (APA) 7th Edition. All references must be relevant, cited and placed after the final section of the proposal. Each reference must be consistent and follow the stated referencing style. The minimum number of references is twelve (12).
- All references must be available to readers at the time of publication; there should be no “unpublished” or “in press” references.

By adhering to these guidelines, you can produce a scholarly article that is well-structured, clear, and suitable for submission to an academic journal. Ensure the paper is free from grammatical errors and properly formatted according to the journal's requirements. Submit the manuscript electronically, following any specific submission processes outlined by the journal.

8. EXHIBITION GUIDELINES

Project Exhibition Guidelines (Week 13)

These guidelines provide a checklist and best practices for preparing and presenting your multimedia project during the exhibition. The goal is to create a professional and engaging booth that effectively showcases your project.

1. Laptop

- Ensure your laptop is fully charged and updated with the latest version of the multimedia prototype.
- Test the prototype on your laptop beforehand to avoid technical issues during the exhibition.
- Keep necessary cables and an external mouse if required for navigation.

2. Extension Cord

- Bring a reliable extension cord to ensure access to power, especially if the booth is far from outlets.
- Test the extension cord before the event to ensure its functioning properly.

3. Poster

- Design a visually appealing poster summarizing your **project's title, introduction (include problem statement), methodology, novelty, impact, contribution and features (interfaces)**.
- Ensure the poster is large enough to be readable from a distance, with clear headings, images, and key points.
- Use a consistent font and color scheme to maintain a professional appearance.
- The size of the poster must be in A2 size (420 x 594 mm).
- UUM logo must be included at the top (left or right) of the poster and the student and supervisor’s information (name and matric number) is included at the bottom of the poster.

4. Headphones

- Provide headphones for attendees to experience the audio components of your multimedia prototype, if applicable.
- Test the headphones beforehand and ensure the sound quality is clear.
- If possible, bring extra pairs in case of malfunction or for multiple attendees.

5. Tablecloth

- Use a clean, professional tablecloth that fits your booth's table to enhance the presentation.
- Choose a colour that complements your project's theme without being distracting.

6. Brochures

- Prepare brochures summarizing your project, including key information such as objectives, technologies used, features, and contact information.
- Make the design clear and concise, with bullet points or infographics for easy readability.
- Keep enough copies for distribution throughout the exhibition.

7. Booth Decorations

- Add booth decorations that are relevant to your project to enhance the visual appeal and attract attention.
- Decorations should not overwhelm the project presentation but should complement the theme or subject of the multimedia prototype.
- Consider using models, props, or visuals related to your project's content to engage visitors.

Additional Tips:

- Arrive early to set up and troubleshoot any potential issues.
- Ensure your booth is organized, clean, and inviting.
- Be prepared to explain your project clearly and answer questions from attendees.
- Engage visitors by encouraging them to interact with your prototype and provide feedback.

By following these guidelines, you will ensure a professional and engaging presentation of your multimedia project that captures the attention of exhibition attendees.

9. AI USAGE POLICY

a) Purpose of AI Usage Policies

The integration of Artificial Intelligence (AI) into multimedia projects is increasingly common and can greatly enhance creativity, efficiency, and functionality. However, the use of AI must be governed by clear policies to ensure ethical practices, academic integrity, and the originality of student work. These policies outline the acceptable use of AI tools, the responsibilities of students, and the evaluation criteria for AI-assisted work in Multimedia Final Year Projects.

b) Acceptable Uses of AI in Multimedia Projects

- **AI for Creative Assistance**:
    - **Design and Creation**: AI tools may be used to assist in generating design elements such as graphics, animations, and visual effects, provided that these elements are further customized by the student.
    - **Content Generation**: AI can be utilized to generate ideas, draft scripts, or create content as a starting point, but it must not replace the student's original input and creative decision-making.
- **AI for Technical Assistance**:
    - **Data Processing**: AI may be employed for tasks like image recognition, data analysis, or automating repetitive processes that would otherwise be time-consuming.
    - **Optimization and Enhancement**: AI tools may be used to optimize multimedia content, such as enhancing video quality, improving audio clarity, or refining animations.
- **AI for User Interaction**:
    - **Chatbots and Virtual Assistants**: Students may incorporate AI-driven chatbots or virtual assistants into their projects to facilitate user interaction, provided the AI enhances the user experience and is not solely responsible for it.
    - **Personalization**: AI can be used to tailor content or user experiences based on data-driven insights, as long as the underlying design and logic are developed by the student.

c) Prohibited Uses of AI in Multimedia Projects

- **Plagiarism and Misrepresentation**:
    - **Complete AI-Generated Content**: Submitting AI-generated work as entirely original without significant modification or input from the student is prohibited. Projects must demonstrate the student’s individual effort, creativity, and understanding.

- **Unattributed AI Content**: All AI-generated content must be appropriately cited and acknowledged. Failing to disclose the use of AI tools or claiming AI-generated content as original work constitutes academic misconduct.

- **Overreliance on AI**:
  - **Lack of Human Input**: Projects that rely excessively on AI with minimal human intervention or creative input from the student are not acceptable. The use of AI should complement, not replace, the student's work.
  - **Automated Decision-Making**: Relying solely on AI for key project decisions, such as content selection, design choices, or narrative direction, is not permitted. Students must demonstrate their ability to make critical decisions independently of AI assistance.

d) Student Responsibilities

- **Transparency and Disclosure**:
  - **AI Usage Documentation**: Students must document the extent and nature of AI usage in their projects. This includes detailing which AI tools were used, for what purposes, and how they contributed to the final product.
  - **Ethical Considerations**: Students are responsible for ensuring that their use of AI adheres to ethical standards, including respect for intellectual property, privacy, and fairness.
- **Skill Development and Originality**:
  - **Skill Enhancement**: The use of AI should be an opportunity for students to enhance their skills, not circumvent the learning process. Students are encouraged to use AI as a tool to deepen their understanding of multimedia production.
  - **Original Contribution**: The final project must reflect the student's original ideas and contributions, with AI serving as an assistive tool rather than the primary creator.

e) Evaluation and Assessment Criteria

- **Originality and Creativity**:
  - Projects will be assessed based on the originality of ideas and the creative application of AI. Students must demonstrate how AI was used to enhance, not replace, their creative process.
- **Transparency and Ethical Use**:
  - The transparency of AI usage and adherence to ethical guidelines will be evaluated. Students must clearly indicate where and how AI tools were used and ensure that all AI-generated content is appropriately attributed.

- **Balance Between AI and Human Input**:
    - Evaluators will assess the balance between AI assistance and human input. The project should showcase the student's skills and understanding, with AI serving as a supportive tool rather than a crutch.
- **Technical Proficiency**:
    - Students will be evaluated on their technical proficiency in integrating AI tools into their multimedia projects. This includes how effectively they harness AI to enhance the project while maintaining control over the creative and technical aspects.

f) Consequences of Policy Violations

- **Academic Penalties**:
    - Violations of these AI usage policies, such as submitting AI-generated work without proper disclosure or overreliance on AI, will result in academic penalties. This may include a reduction in the project grade, failure of the course, or other disciplinary actions as deemed appropriate by the academic institution.
- **Revisions and Resubmissions**:
    - If a project is found to violate AI usage policies, students may be required to revise and resubmit their work, with the AI-generated content removed or significantly modified to meet the guidelines.

g) Final Considerations

- **Innovation Encouraged**:
    - While these policies set boundaries, they are also designed to encourage innovation. Students are encouraged to explore the potential of AI creatively and ethically, pushing the boundaries of multimedia production while maintaining academic integrity.
- **Ongoing Policy Review**:
    - As AI technology evolves, these policies will be reviewed and updated to reflect new developments and ensure they remain relevant and fair. Students are encouraged to stay informed about any changes to AI usage guidelines.

This AI Usage Policy aims to ensure that students utilize AI tools in a way that enhances their learning experience while maintaining the integrity and originality of their work.

10. WORK PROGRESS

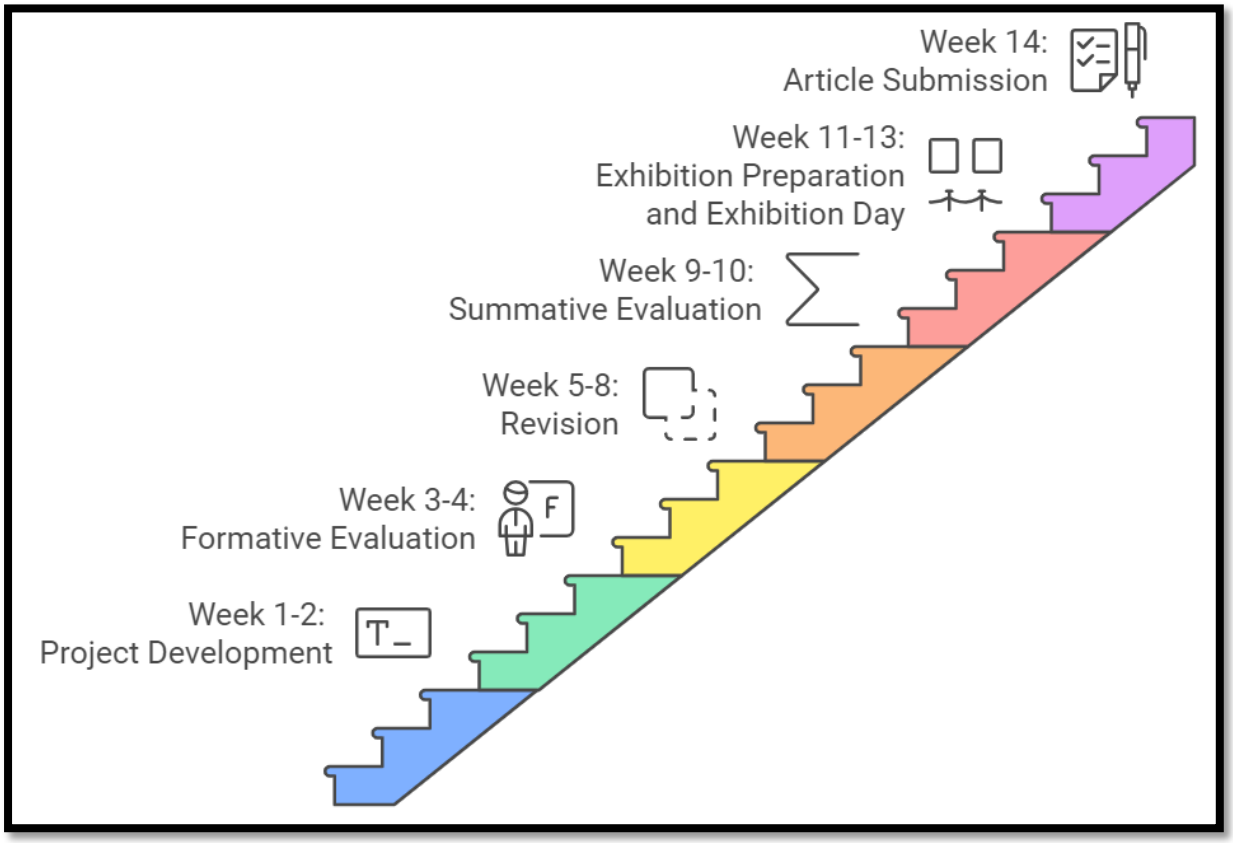

Figure 2

Work Progress Activities

11. ACADEMIC PROJECT RUBRICS

Academic Project 2 will be evaluated based on four skills which are Practical skills, Cognitive skills, Communication skills and lastly Ethics and Profesionalism. Based on Figure 3, Practical skills, which make up 40% of the total assessment, focus on the student's ability to create a final product, with supervisors contributing 30% of the evaluation and assessors adding an additional 10% for objectivity. Cognitive skills, accounting for 45%, measure the student's critical thinking and intellectual abilities through a combination of summative evaluations (15%), formative assessments (15%), and scholarly article submissions (15%) conducted by supervisors. Communication skills contribute 10% to the overall score, assessing how well students can present their ideas, both verbally (5%) and in written or visual formats (poster) (5%). Ethics and Professionalism, though smaller in weightage (5%), are equally critical, as they reflect the student's adherence to ethical standards and professional conduct, judged by the supervisor. This framework not only ensures a fair and balanced evaluation but also prepares students for real-world scenarios by fostering both technical and interpersonal skills, encouraging continuous improvement, and promoting accountability and professionalism.

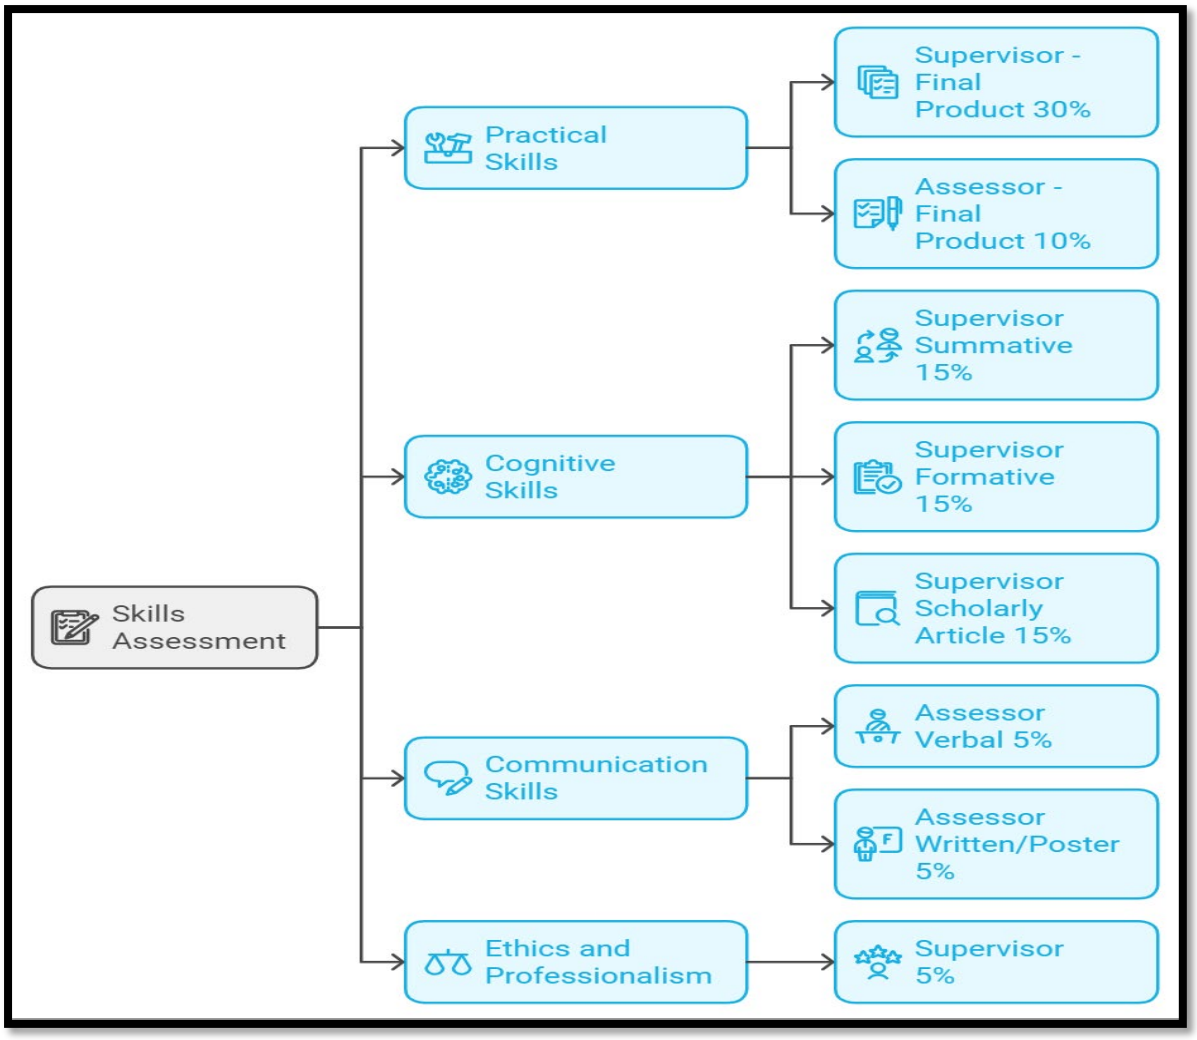

Figure 3

Academic Project 2 skills assessments

12. RUBRICS FOR FINAL PRODUCT (40%)

The final product will be evaluated based on Practical Skills and Cognitive Skill.

For the Practical skills, the evaluation will be made by the supervisor (30%) and the accessor (10%). The final product is divided into Type 1: Interactive Multimedia Project and Type 2: Non-Interactive Multimedia Project. Table 2 shows the difference between these two types of projects.

Table 2

Types of Multimedia Projects

Types of Interactive Multimedia Project	Types of Non-Interactive Multimedia Project
1. Mobile application 2. Web application 3. AR / VR / IoT / MR / evolving technology 4. Games 5. Interactive media (offline courseware/kiosk)	1. Video/ Documentary 2. 2D/3D Animation.

i. **Rubric LOC3a: Practical Skills**

Practical skills involve the application of theoretical knowledge to real-world scenarios, focusing on the ability to perform tasks accurately and effectively. Practical skills encompass techniques, methods, and procedures necessary for professional practice, ensuring students can operate equipment, use relevant tools, and adhere to industry standards. The aim is to foster problem-solving abilities, precision, and a capacity for practical innovation, preparing students for competency in a work environment.

Rubrics for Interactive Multimedia Project

LOC3a: Practical Skills (Interactive Multimedia Project)- 30% (Supervisor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)
Work effort (Time, energy, and dedication put into completing a project or task.)	No submission	The project was completed with minimum effort	The student finished the project, but it could have been improved with more effort.	The project was complete but with a bit more effort it might have been outstanding.	The project was complete, and students gave it effort far beyond that required.
Visual appearance (Overall look and design quality of a project, including color, layout, and aesthetics.)	No submission	Appearance is only somewhat neat or not neat at all. Not thought out or evidence of effort was not made to create good artworks.	Appearance is neat but not thought out. More time was needed to show effort was made to create the artwork for fulfilling the concept.	Appearance is neat, well thought out, and obvious effort was made to create artwork to fulfil the concepts.	Appearance is neat, well thought out, and obvious effort was made to create artwork to fulfil the concepts.

Research (Process of gathering information and data to support the content or design of a project.	No submission	Poor research has been carried out to present the topic.	Minimal research has been carried out to present the topic.	Good research has been carried out to present the topic.	Thorough research has been carried out to present the topic.
Creativity (Originality and innovation shown in developing ideas, designs, or concepts in the project.)	No submission	Shows limited creativity.	Demonstrates moderate creativity	Displays good creativity	Shows exceptional creativity
User Control (Level of freedom and flexibility a user has to interact with or navigate a multimedia project.)	Users have no control; navigation is confusing or absent.	Users have limited control, and navigation is unclear.	Users have moderate control, but navigation could be improved.	Users have good control with some interactive elements and clear navigation.	Users have full control with intuitive navigation and multiple interactive elements.
Interactivity/Behaviour (Degree to which users can engage with and influence the content, actions, or outcomes in the project.)	No user input//interaction or feedback is present.	Minimal user input//interaction, with inconsistent or delayed feedback.	Limited user input//interaction is required, and feedback is occasionally delayed.	Some user input//interaction is required, and feedback is mostly immediate.	Extensive user input//interaction is required with immediate feedback, and user choices affect the outcome.
Multimedia Integration (Seamless combination of different media elements (text, images, audio, video) in the project to enhance communication.)	No multimedia elements are integrated or interactive.	Few multimedia elements are integrated, with little interactivity.	Some multimedia elements are integrated, but interactivity is lacking.	Most multimedia elements are well integrated with some interactive features.	All multimedia elements (audio, video, text, etc.) are well integrated and support interactivity.
Feedback Mechanism (System or tools used to provide users with responses or guidance during their interaction with the project.)	No feedback is provided.	Feedback is minimal and inconsistent.	Feedback is delayed or not always relevant to user actions.	Mostly immediate and relevant feedback but lacking in detail.	Immediate, relevant, and detailed feedback is provided throughout the project.
Message/content & Purpose (Main idea or goal of the project, making sure it communicates effectively.)	No clear message or purpose.	The message is unclear or lacks alignment with the project purpose.	The message is somewhat clear but lacks strong alignment with the project purpose.	The message is mostly clear and aligns with the project purpose.	The message is clear, compelling, and fully aligns with the project purpose.
TOTAL					**/ 36**
TOTAL – 30%

Creativity (Originality and innovation shown in developing ideas, designs, or concepts in the project.)	No submission	Shows limited creativity.	Demonstrates moderate creativity	Displays good creativity	Shows exceptional creativity
User Control (Level of freedom and flexibility a user has to interact with or navigate a multimedia project.)	Users have no control; navigation is confusing or absent.	Users have limited control, and navigation is unclear.	Users have moderate control, but navigation could be improved.	Users have good control with some interactive elements and clear navigation.	Users have full control with intuitive navigation and multiple interactive elements.
Interactivity/Behaviour (Degree to which users can engage with and influence the content, actions, or outcomes in the project.)	No user input//interaction or feedback is present.	Minimal user input//interaction, with inconsistent or delayed feedback.	Limited user input//interaction is required, and feedback is occasionally delayed.	Some user input//interaction is required, and feedback is mostly immediate.	Extensive user input//interaction is required with immediate feedback, and user choices affect the outcome.
Multimedia Integration (Seamless combination of different media elements (text, images, audio, video) in the project to enhance communication.)	No multimedia elements are integrated or interactive.	Few multimedia elements are integrated, with little interactivity.	Some multimedia elements are integrated, but interactivity is lacking.	Most multimedia elements are well integrated with some interactive features.	All multimedia elements (audio, video, text, etc.) are well integrated and support interactivity.
Feedback Mechanism	No feedback is provided.	Feedback is minimal and inconsistent.	Feedback is delayed or not always	Mostly immediate and relevant	Immediate, relevant, and detailed

(System or tools used to provide users with responses or guidance during their interaction with the project.)			relevant to user actions.	feedback but lacking in detail.	feedback is provided throughout the project.
Message/content & Purpose (Main idea or goal of the project, making sure it communicates effectively.)	No clear message or purpose.	The message is unclear or lacks alignment with the project purpose.	The message is somewhat clear but lacks strong alignment with the project purpose.	The message is mostly clear and aligns with the project purpose.	The message is clear, compelling, and fully aligns with the project purpose.

Rubrics for Non-Interactive Multimedia Project

LOC3a: Practical Skills (Non-Interactive Multimedia Project)- 30% (Supervisor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)
Work effort (Time, energy, and dedication put into completing a project or task.)	No submission	The project was completed with minimum effort	The student finished the project, but it could have been improved with more effort.	The project was complete but with a bit more effort it might have been outstanding.	The project was complete, and students gave it effort far beyond that required.
Techniques (Methods and skills used to create a project, including software tools and design practices.)	No submission	Demonstrate poor techniques in producing the artefacts / artworks to achieve the goal.	Demonstrate an adequate technique in producing the artefacts / artworks to achieve the goal.	Demonstrate a good technique in producing the artefacts / artworks to achieve the goal.	Demonstrate excellent techniques in producing the artefacts / artworks to achieve the goal.
Research (Process of gathering information and data to support the content or design of a project.	No submission	Poor research has been carried out to present the topic.	Minimal research has been carried out to present the topic.	Good research has been carried out to present the topic.	Thorough research has been carried out to present the topic.
Creativity (Originality and innovation shown in developing ideas, designs, or concepts in the project.)	No submission	Shows limited creativity.	Demonstrates moderate creativity	Displays good creativity	Shows exceptional creativity
Content Structure (How well the information is organized and easy to follow.)	Content is disorganized and confusing.	Content is poorly organized and difficult to follow.	Content is somewhat organized but could be clearer.	Content is mostly well-organized and easy to follow.	Content is well-organized, logical, and flows smoothly.

Multimedia Elements (Use of different media like text, images, audio, and video to enhance the content.)	No or very poorly integrated multimedia elements.	Multimedia elements are poorly integrated and detract from understanding.	Some multimedia elements are integrated, but effectiveness is limited.	Multimedia elements are well integrated and generally effective.	Multimedia elements (audio, video, text) are seamlessly integrated and enhance understanding.
Visual and Audio Quality (The quality of visuals and sound in the project, ensuring they are clear and professional.)	Very poor-quality visuals and audio, making the project difficult to engage with.	Poor-quality visuals and audio that detract from the experience.	Satisfactory visuals and audio, though several noticeable issues exist.	Good-quality visuals and audio, though some minor issues are present.	High-quality visuals and audio that enhance the project experience.
Message & Purpose (Main idea or goal of the project, making sure it communicates effectively.)	No clear message or purpose.	The message is unclear or lacks alignment with the project purpose.	The message is somewhat clear but lacks strong alignment with the project purpose.	The message is mostly clear and aligns with the project purpose.	The message is clear, compelling, and fully aligns with the project purpose.

11. RUBRICS FOR SUMMATIVE AND FORMATIVE ASSESSMENT (30%)

ii. Rubric LOC2: Cognitive Skills

Cognitive skills involve thinking or intellectual capabilities and applying knowledge and skills. The capacity to develop intellectual skills progressively begins from understanding, critical/ creative thinking, assessment, applying, analysing, problem-solving, and synthesising to create new ideas, solutions, strategies, or new practices. These skills enable learners to search and comprehend new information from various knowledge and practices.

LOC2 : Cognitive Skill (Summative and Formative Evaluation) – Supervisor (30%)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)
1. Problem Identification: Evaluation Objectives (*The process of recognising and identifying an issue that may cause a problem or conflict which explain in the introduction section*).	Fails to identify evaluation objectives or misunderstands the core issues which stated in the **introduction** section.	Identifies evaluation objectives and its related issues in the **introduction** section with limited accuracy, missing several key issues.	Identifies evaluation objectives and its related issues in the **introduction** section with moderate accuracy, though some key issues may be overlooked.	Identifies evaluation objectives and its related issues in the **introduction** section accurately, recognizing key issues effectively.	Clearly identifies evaluation objectives and underlying issues in the **introduction** section with depth and clarity.
2. Decision-Making: Data Collection Techniques *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in selecting **data collection techniques.**	Makes decisions impulsively or without adequate analysis or evaluation in selecting **data collection techniques.**	Makes decisions based on limited analysis or evaluation in in selecting **data collection techniques.**	Makes sound decisions based on analysis and evaluation in selecting **data collection techniques.**	Makes well-reasoned decisions based on thorough analysis and evaluation in selecting **data collection techniques.**
3. Decision-Making: Participants *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in recruiting **participants**	Makes decisions impulsively or without adequate analysis or evaluation in recruiting **participants**	Makes decisions based on limited analysis or evaluation in recruiting **participants**	Makes sound decisions based on analysis and evaluation in recruiting **participants**	Makes well-reasoned decisions based on thorough analysis and evaluation in recruiting **participants**
4. Decision-Making: Instruments *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in applying **instruments.**	Makes decisions impulsively or without adequate analysis or evaluation in	Makes decisions based on limited analysis or evaluation in applying **instruments**.	Makes sound decisions based on analysis and evaluation in applying **instruments**.	Makes well-reasoned decisions based on thorough analysis and evaluation in applying **instruments**.

		applying **instruments**.			
5. Decision-Making: Procedures *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in applying **Procedures.**	Makes decisions impulsively or without adequate analysis or evaluation in applying **Procedures**.	Makes decisions based on limited analysis or evaluation in applying **Procedures**	Makes sound decisions based on analysis and evaluation in applying **Procedures**.	Makes well-reasoned decisions based on thorough analysis and evaluation in applying **Procedures**.
6. Decision-Making: Metrics/Dimensions *(The thought process of selecting a solution from several alternative).*	Fails to make meaningful decisions in measuring **metrics** /**dimension.**	Makes decisions impulsively or without adequate analysis or evaluation in measuring **metrics /dimension.**	Makes decisions based on limited analysis or evaluation in measuring **metrics /dimension.**	Makes sound decisions based on analysis and evaluation in measuring **metrics /dimension.**	Makes well-reasoned decisions based on thorough analysis and evaluation in measuring **metrics /dimension.**
7. Analysis: Results (*The process of separating or detailed examination of gathered, measured, or collected data, into smaller elements for decision-making or interpretation research methodology section).*	Lacks analysis or misinterprets the data and information provided in the **results** section.	Conducts limited analysis, addressing only a few relevant factors or relationships in the **results** section.	Conducts basic analysis, addressing some relevant factors and relationships in the **results** section.	Conducts thorough analysis, considering most relevant factors and relationships in the **results** section.	Demonstrates sophisticated analysis, systematically examining all relevant factors and relationships in the **results** section.
8. Application: Evaluation Concepts/ Principles *(The action of putting ideas or solutions into operation to apply evaluation* concepts and or *theories/ principles/* guidelines*).*	Fails to apply **evaluation concepts** and/or **theories/ principles/guidelines** to the prototype effectively.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** inconsistently or inaccurately to the prototype.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** adequately to the prototype in familiar contexts.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** appropriately to the prototype.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** effectively to the prototype.
9. Application: Referencing Styles *(The action of putting ideas or solutions into operation to solve writing style section).*	Fails to apply **the stated referencing styles** effectively in the report.	Applies **the stated referencing styles** inconsistently or inaccurately in the report.	Applies **the stated referencing styles** adequately in the report.	Applies **the stated referencing styles** appropriately in the report.	Applies **the stated referencing styles correctly and** effectively in the report.
TOTAL					**/ 36**

12. RUBRICS FOR EXHIBITION PRESENTATION – 10%

The presentations during the exhibition will be evaluated by assessors using a communication skills rubric, which accounts for 10% of the overall marks. The evaluation will be divided into two sections:

(1) Verbal communication includes the ability to articulate ideas clearly and persuasively, engage the audience, and present information in a structured and coherent manner. Verbal communication focuses on spoken skills, such as clarity, tone, and audience interaction
(2) Written communication (poster) encompasses the organization, clarity, and visual appeal of materials like posters. Mastering these skills is vital for successful presentations, as they enhance understanding, foster engagement, and facilitate effective information sharing.

LOC3c: Communication Skills (Verbal) - 5% (Assessor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)
Knowledge and Content *(Demonstrates understanding and familiarity with the subject matter)*	Demonstrates a lack of understanding of the subject matter. Content is irrelevant or inaccurate	Shows limited understanding of the subject matter, with significant gaps in knowledge or relevance. Content is quite relevant and accurate.	Demonstrates a basic understanding of the subject matter, but some key points or details may be lacking or unclear. Content is relevant, and accurate.	Shows a strong understanding of the subject matter. Content is very relevant and accurate.	Demonstrates exceptional knowledge of the subject matter. Content is very relevant and thoroughly accurate.
Organization and Structure *(The ability to organize the presentation and present information logically)*	Information is very poorly organized with no clear structure or flow; very difficult to follow	Information is poorly organized, making it difficult to follow.	Information is somewhat organized but may have minor issues with flow and clarity	Information is well-organized with a mostly clear, logical flow; generally easy to follow	Information is excellently organized with a clear, logical flow; easy to follow.
Clarity and Delivery *(The ability to communicate well and organise thoughts.* *Delivery: Demonstrates effective and engaging presentation of information)*	Communication is extremely unclear, making it nearly impossible for the audience to understand the message. Articulation, pacing, and projection are severely lacking.	Communication lacks clarity, making it challenging for the audience to follow the message. Articulation, pacing, or projection needs significant improvement.	Communicates ideas with some clarity, but improvements in articulation, pacing, or projection are needed.	Communicates ideas clearly and with good articulation, pacing, and projection.	Communicates ideas clearly and effectively, with excellent articulation, pacing, and projection.

Engagement and Interaction *(The ability to engage and interact with the audience)*	Fails to engage the audience effectively. No interaction, hindering audience involvement.	Engagement with the audience is limited, and there's minimal interaction. Encouragement for questions and discussion is lacking.	Engages the audience to a satisfactory extent but could improve in terms of enthusiasm, and interaction.	Engages the audience well and demonstrating enthusiasm. Encourages some questions and discussion.	Engages the audience effectively through enthusiasm, and interaction. Encourages questions and discussion, creating an interactive and dynamic environment.
Expression *(Effective transmission of ideas, and intent through intonation, facial expression, body language, and eye contact)*	No variation in tone and pitch, resulting in a monotonous or unclear delivery of the message. Rarely uses gestures or body movements, contributing minimally or not at all to the message. Poor facial expression or no eye contact with the audience.	Limited variation in tone and pitch, affecting the conveyance of emotions and emphasis. Uses minimal gestures or body movements, lacking in supporting or enhancing the message. Inconsistent in facial expression or poor eye contact with the audience.	Adequate variation in tone and pitch, conveying emotions and emphasis reasonably well. Uses some gestures and body movements that complement the message but may occasionally be distracting or not fully supportive. Maintains facial expression and acceptable eye contact with the audience.	Demonstrates good variation in tone and pitch, effectively conveying the intended emotions and emphasis. Uses suitable gestures and body movements that complement the message. Maintains facial expression and consistent eye contact, generally enhancing audience engagement.	Exceptional variation in tone and pitch that enhances the meaning and engagement of the message. Uses a wide range of appropriate gestures and body movements that significantly augment the message without being distracting. Maintains excellent facial expression and eye contact throughout, enhancing audience engagement.
Adaptability and Response to Feedback *(Ability to response and adapt to audience or unexpected situation)*	Fails to adapt to unexpected situations, feedback, or questions. Responses are inadequate or inappropriate.	Struggles to adapt to unexpected situations, feedback, and questions. Responses lack depth and critical thinking.	Demonstrates some ability to adapt to unexpected situations, feedback, and questions. Responses are generally appropriate but could be improved.	Adapts well to unexpected situations, feedback, and questions. Responses are appropriate and display critical thinking.	Demonstrates exceptional ability to adapt to unexpected situations, feedback, and questions. Responses are insightful and demonstrate critical thinking.

TOTAL – 5%					

LOC3c: Communication Skills (Written/Poster) - 5% (Assessor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)
Visual Appeal (*Aesthetic aspects of the poster, including its design, layout, colour scheme, and overall attractiveness*)	Very poor design, no effective use of color or graphics, unattractive, fails to capture attention.	Poor design, ineffective use of color and graphics, not aesthetically pleasing, struggles to capture attention.	Average design, some use of color and graphics, somewhat pleasing, captures attention to some extent.	Attractive design, good use of color and graphics, generally pleasing, captures attention well.	Highly attractive design, excellent use of color and graphics, aesthetically pleasing, captures attention effectively.
Clarity and Organization *(The ability to clearly communicate and organize ideas, points, and information in writing)*	The information is unclear, disorganized, and difficult to understand.	The information lacks clarity and organization, making it challenging to follow. Significant improvements are needed.	The information is generally clear and organized, but some areas could be improved for better clarity or structure.	The information is clear and well-organized, with few minor issues in organization or clarity.	The information is exceptionally clear, well-organized, and easy to follow. Ideas are logically structured, and the content flows smoothly.
Content and Relevance *(Writing's content, including facts, details, arguments, and evidence related are relevancy to the topic)*	The content is irrelevant, inaccurate, or lacks substance.	The content is relevant but lacks depth, accuracy, or relevance in some areas.	The content is mostly relevant but may contain some inaccuracies or gaps in information.	The content is relevant and generally well-researched, with some minor gaps or areas for improvement.	The content is highly relevant, well-researched, and provides valuable insights or information. It fully addresses the topic or purpose.
Creativity and Originality *(The ability to generate unique ideas and how well the presentation stands out from others and captures the audience's interest)*	No creativity or originality; fails to engage the audience.	Lacks creativity and originality; does not engage the audience effectively.	Somewhat creative and original presentation; captures some interest.	Mostly creative and original presentation; engages the audience well.	Highly creative and original presentation; stands out and captures interest effectively.
Language, Grammar, and Mechanics *(The ability to choose and use words with proper rules, sentence structure, and technical writing aspects for effective writing)*	Writing is extremely unclear and wordy, hindering comprehension. The text is riddled with grammar and mechanical errors, severely impacting readability.	Writing lacks clarity and conciseness, making it difficult to understand the intended message. Numerous grammar and mechanical errors are present,	Writing is generally clear but may be somewhat wordy or unclear in places. Some minor grammar and mechanical errors are present but do	Writing is clear and mostly concise, with only a few minor instances of wordiness or ambiguity. There are very few grammar and mechanical errors, and they	Writing is exceptionally clear and concise, with no unnecessary words or jargon. The message is easily understood.

		making the message challenging to read.	not greatly impede comprehension.	do not significantly impact understanding.	Writing is virtually error-free, with impeccable grammar, punctuation, and spelling throughout.

13. RUBRICS FOR SCHOLARLY ARTICLE – 15%

Students are required to write *either* a scholarly **journal article** *or* **chapter(s) in book article** related to their project. Prior discussion with their supervisor to choose this option is mandatory.

A. Write a Journal Article

Template of journal article can be in the following links. Supervisors might also provide another template of their preferences.

i. https://e-journal.uum.edu.my/index.php/jdsd/manuscript-guidelines
ii. https://e-journal.uum.edu.my/index.php/jcisc/manuscript-guideline

B. Write Chapter(s) in book

Template of chapter(s) in book article can be referred to the attached document.

LOC2: Cognitive Skills (Article/Book Chapter) -15%

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advanced (4)
Problem Identification (The process of recognizing and clearly defining an issue or challenge that needs to be addressed) (Introduction)	Fails to identify a clear research question or problem.	Identifies a problem, but it is vague or lacks specificity.	Identifies a problem, but it may have minor ambiguities or omissions.	Clearly identifies a well-defined research problem.	Identifies a complex research problem, contextualizes it within the broader field, and demonstrates a deep understanding of its significance.
Application (in LR) (The practical use of theories, concepts, or methods to solve problems or achieve specific goals.)	Fails to apply concepts or theories to solve problems.	Applies concepts or theories inconsistently or inaccurately to solve problems.	Applies concepts or theories to solve basic problems in familiar contexts.	Applies concepts or theories appropriately to solve various problems in different contexts.	Applies concepts or theories creatively and effectively to solve complex problems in a variety of contexts.
Methodology (The system of methods and procedures used in research or problem-solving.)	No methodology is described, or it is inappropriate.	Methodology is described but lacks rigor or clarity.	Methodology is generally appropriate but may have minor flaws.	Methodology is sound, appropriate, and well-explained, with appropriate data collection and analysis techniques.	Methodology is innovative and contributes to the advancement of the field, using advanced techniques or developing new methods.

Analysis The careful examination and breakdown of information or data to understand a problem and examines relationships. (Results)	Lacks any analytical framework or fails to analyse the data.	Conducts limited analysis, focusing on superficial aspects of the data.	Conducts basic analysis, considering some relevant factors and relationships.	Conducts thorough analysis, considering most relevant factors and relationships.	Demonstrates sophisticated analysis, examining all relevant factors and identifying underlying issues.
Decision-Making The act of choosing any action after evaluating different options or alternatives. (Discussion / Conclusion)	Fails to make meaningful decisions or conclusions.	Makes decisions or conclusions without adequate justification or evaluation.	Makes decisions or conclusions based on limited analysis of options.	Makes sound decisions based on thorough analysis of options and evaluation of alternatives.	Makes well-reasoned decisions based on a comprehensive analysis and evaluation of options.
Citations and References (Acknowledges and gives credit to the work of others.)	No citations or references are used.	Citations and references are used, but they may be inaccurate or irrelevant.	Citations and references are used appropriately, but they may be limited in scope.	Citations and references are used effectively to support the argument and demonstrate a thorough understanding of the literature.	Citations and references are used creatively and innovatively to contribute to the field, with a diverse range of sources.
Clarity and Coherence (Clarity: The quality of being easy to understand. Coherence: The logical and smooth flow of ideas in a consistent, connected manner.)	Lacks clarity and coherence, making the article difficult to understand.	Ideas are presented in a disorganized manner, with some inconsistencies.	Ideas are generally clear, but there may be minor inconsistencies or ambiguities.	Ideas are clearly presented and well-organized, with a logical flow.	Ideas are presented in a highly sophisticated and engaging manner, with exceptional clarity and coherence.
Originality (The quality of being novel, creative, or unique, contributing new ideas or insights)	Does not contribute any new knowledge or perspectives.	Contributes limited new knowledge or perspectives.	Contributes some new knowledge or perspectives.	Contributes significant new knowledge or perspectives.	Contributes groundbreaking new knowledge or perspectives, challenging existing paradigms or developing innovative approaches.
TOTAL					**/32**
TOTAL – 15%					

14. RUBRIC FOR ETHICS AND PROFESIONALISM (5%)

Ethics is the discipline of dealing with good and bad things with moral commitment and responsibility. University students should acquire academic responsibility and integrity and practice self-discipline to demonstrate ethics. Professionalism is how students respond to required standards and take responsibility for meeting them. Professionalism was applied through characteristics, behaviours, commitments, values, and goals. In contrast, professionalism leads to successful work and a positive reputation.

LOC5: Ethics and Professionalism - 5%

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advanced (4)
Ethical Awareness (Understanding right and wrong and making responsible choices.)	Cannot demonstrate awareness of ethical principles and issues.	Shows some awareness of ethical principles but inconsistently applies them.	Consistently demonstrates awareness of ethical principles and their importance.	Applies ethical principles effectively and consistently in decision-making.	Exemplifies exceptional ethical awareness and consistently acts in accordance with high ethical standards.
Integrity (Being honest and staying true to your values.)	Does not perform a task with trust, honesty, sincerity, and transparency	Perform a task with limited trust, honesty, sincerity, and transparency	Perform a task with acceptable trust, honesty, sincerity, and transparency	Perform a task with trust, honesty, sincerity, and transparency in most situations	Always perform a task with trust, honesty, sincerity, and transparency in most situations
Professional Responsibility (Following professional standards and being accountable for your work.)	Cannot take responsibility for professional responsibility and commitments.	Occasionally takes responsibility for professional responsibility but may require reminders.	Consistently accepts and fulfils professional responsibilities and commitments.	Takes proactive responsibility for professional responsibility and exceeds expectations.	Demonstrates exceptional dedication to professional responsibilities and consistently exceeds expectations.
Work Responsibility (Taking ownership of your tasks and meeting deadlines.)	Does not perform any assigned tasks.	Does not perform assigned tasks within the scope of work even with close supervision	Perform assigned tasks within the scope of work and meet expectation	Perform assigned tasks within the scope of work and exceed expectation	Perform assigned tasks beyond the scope of work and beyond expectation
Work Ethics (Showing commitment, reliability, and fairness in your work.)	Does not practice any working culture such as bad morals, no punctuality as well as being inefficient, unproductive, and unethical at work	Practice less appropriate working culture such as inconsistent behavior, less punctuality as well as being less efficient, productive and ethical at work in many situation	Practice good working culture such as good morals, punctual as well as being efficient, productive and ethical at work in general	Practice good working culture such as good moral, punctual as well as being efficient, productive and ethical at work in most situation	Always practice excellence working culture such as good moral, punctual as well as being efficient, productive and ethical at

					work in all situations

SCVZK3993/4993 Academic Project 1/Academic Project 2

Consent Form for Participation in Research/Project

Project Title:
[Insert Title of Project]

Researcher/Project Developer:
[List the names, degrees, affiliations, and contact details of all researchers involved, including academic supervisors, where relevant]

Purpose of the Study:
[Provide a brief description of the study, including its objectives and significance, in clear and concise terms.]

Consent Declaration

I, _____, voluntarily agree to participate in this research/project. By signing this consent form, I acknowledge and confirm the following:

1. Voluntary Participation:
   - I understand that my participation in this study is entirely voluntary.
   - I may withdraw at any time without providing a reason and without facing any consequences.
2. Purpose and Procedures:
   - The purpose and nature of the research/project have been fully explained to me in writing.
   - I have had the opportunity to ask questions and receive satisfactory answers about the study.
   - I understand that participation involves [clearly outline what participation entails, e.g., completing surveys, attending interviews, etc.].
3. Confidentiality and Anonymity:
   - I understand that all the information I provide will be treated with strict confidentiality.

- Any reports or publications arising from this research/project will ensure anonymity by using pseudonyms and omitting any identifying details.

4. Recording and Data Usage:

   - I agree to my interview/conversation being audio-recorded for the purposes of data collection.
   - I understand that the recordings and all collected data will be securely stored and used only for academic purposes related to this project.

5. Non-Benefit Clause:

   - I acknowledge that I will not receive direct benefits from participating in this research/project.

6. Freedom to Inquire:

   - I understand that I am free to contact any member of the research/project team at any stage of the study for further clarification or information.

Participant Declaration:

By signing below, I confirm that I have read and understood the terms of this consent form. I agree to participate in this research/project under the conditions outlined above.

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)	Total
Work effort (Time, energy, and dedication put into completing a project or task.)	No submission	The project was completed with minimum effort	The student finished the project, but it could have been improved with more effort.	The project was complete but with a bit more effort it might have been outstanding.	The project was complete, and students gave it effort far beyond that required.	
Visual appearance (Overall look and design quality of a project, including color, layout, and aesthetics.)	No submission	Appearance is only somewhat neat or not neat at all. Not thought out or evidence of effort was not made to create good artworks.	Appearance is neat but not thought out. More time was needed to show effort was made to create the artwork for fulfilling the concept.	Appearance is neat, well thought out, and obvious effort was made to create artwork to fulfil the concepts.	Appearance is neat, well thought out, and obvious effort was made to create artwork to fulfil the concepts.	
Research (Process of gathering information and data to support the content or design of a project.	No submission	Poor research has been carried out to present the topic.	Minimal research has been carried out to present the topic.	Good research has been carried out to present the topic.	Thorough research has been carried out to present the topic.	
Creativity (Originality and innovation shown in developing ideas, designs, or concepts in the project.)	No submission	Shows limited creativity.	Demonstrates moderate creativity	Displays good creativity	Shows exceptional creativity	
User Control (Level of freedom and flexibility a user has to interact with or navigate a multimedia project.)	Users have no control; navigation is confusing or absent.	Users have limited control, and navigation is unclear.	Users have moderate control, but navigation could be improved.	Users have good control with some interactive elements and clear navigation.	Users have full control with intuitive navigation and multiple interactive elements.	

Interactivity/Behaviour (Degree to which users can engage with and influence the content, actions, or outcomes in the project.)	No user input//interaction or feedback is present.	Minimal user input//interaction, with inconsistent or delayed feedback.	Limited user input//interaction is required, and feedback is occasionally delayed.	Some user input//interaction is required, and feedback is mostly immediate.	Extensive user input//interaction is required with immediate feedback, and user choices affect the outcome.	
Multimedia Integration (Seamless combination of different media elements (text, images, audio, video) in the project to enhance communication.)	No multimedia elements are integrated or interactive.	Few multimedia elements are integrated, with little interactivity.	Some multimedia elements are integrated, but interactivity is lacking.	Most multimedia elements are well integrated with some interactive features.	All multimedia elements (audio, video, text, etc.) are well integrated and support interactivity.	
Feedback Mechanism (System or tools used to provide users with responses or guidance during their interaction with the project.)	No feedback is provided.	Feedback is minimal and inconsistent.	Feedback is delayed or not always relevant to user actions.	Mostly immediate and relevant feedback but lacking in detail.	Immediate, relevant, and detailed feedback is provided throughout the project.	
Message/content & Purpose (Main idea or goal of the project, making sure it communicates effectively.)	No clear message or purpose.	The message is unclear or lacks alignment with the project purpose.	The message is somewhat clear but lacks strong alignment with the project purpose.	The message is mostly clear and aligns with the project purpose.	The message is clear, compelling, and fully aligns with the project purpose.

16. RUBRICS FOR SUMMATIVE AND FORMATIVE ASSESSMENT (30%)

Name: **Matric Number:**

LOC2 : Cognitive Skill (Summative and Formative Evaluation) – Supervisor (30%)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)	Total
1. Problem Identification: Evaluation Objectives (*The process of recognising and identifying an issue that may cause a problem or conflict which explain in the introduction section*).	Fails to identify evaluation objectives or misunderstands the core issues which stated in the **introduction** section.	Identifies evaluation objectives and its related issues in the **introduction** section with limited accuracy, missing several key issues.	Identifies evaluation objectives and its related issues in the **introduction** section with moderate accuracy, though some key issues may be overlooked.	Identifies evaluation objectives and its related issues in the **introduction** section accurately, recognizing key issues effectively.	Clearly identifies evaluation objectives and underlying issues in the **introduction** section with depth and clarity.	
2. Decision-Making: Data Collection Techniques *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in selecting **data collection techniques.**	Makes decisions impulsively or without adequate analysis or evaluation in selecting **data collection techniques.**	Makes decisions based on limited analysis or evaluation in in selecting **data collection techniques.**	Makes sound decisions based on analysis and evaluation in selecting **data collection techniques.**	Makes well-reasoned decisions based on thorough analysis and evaluation in selecting **data collection techniques.**	
3. Decision-Making: Participants *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in recruiting **participants**	Makes decisions impulsively or without adequate analysis or evaluation in recruiting **participants**	Makes decisions based on limited analysis or evaluation in recruiting **participants**	Makes sound decisions based on analysis and evaluation in recruiting **participants**	Makes well-reasoned decisions based on thorough analysis and evaluation in recruiting **participants**	
4. Decision-Making: Instruments *(The thought process of selecting a solution from several alternatives).*	Fails to make meaningful decisions in applying **instruments.**	Makes decisions impulsively or without adequate analysis or evaluation in applying **instruments**.	Makes decisions based on limited analysis or evaluation in applying **instruments**.	Makes sound decisions based on analysis and evaluation in applying **instruments**.	Makes well-reasoned decisions based on thorough analysis and evaluation in applying **instruments**.	
5. Decision-Making: Procedures	Fails to make meaningful decisions in applying **Procedures.**	Makes decisions impulsively or without adequate analysis or	Makes decisions based on limited analysis or	Makes sound decisions based on analysis and	Makes well-reasoned decisions based on thorough analysis and	

(The thought process of selecting a solution from several alternatives).		evaluation in applying **Procedures**.	evaluation in applying **Procedures**	evaluation in applying **Procedures**.	evaluation in applying **Procedures**.

Decision-Making: Metrics/Dimensions *(The thought process of selecting a solution from several alternative).*	Fails to make meaningful decisions in measuring **metrics /dimension.**	Makes decisions impulsively or without adequate analysis or evaluation in measuring **metrics /dimension.**	Makes decisions based on limited analysis or evaluation in measuring **metrics /dimension.**	Makes sound decisions based on analysis and evaluation in measuring **metrics /dimension.**	Makes well-reasoned decisions based on thorough analysis and evaluation in measuring **metrics /dimension.**	
7. Analysis: Results (*The process of separating or detailed examination of gathered, measured, or collected data, into smaller elements for decision-making or interpretation research methodology section).*	Lacks analysis or misinterprets the data and information provided in the **results** section.	Conducts limited analysis, addressing only a few relevant factors or relationships in the **results** section.	Conducts basic analysis, addressing some relevant factors and relationships in the **results** section.	Conducts thorough analysis, considering most relevant factors and relationships in the **results** section.	Demonstrates sophisticated analysis, systematically examining all relevant factors and relationships in the **results** section.	
8. Application: Evaluation Concepts/ Principles *(The action of putting ideas or solutions into operation to apply evaluation* concepts and or *theories/ principles/* guidelines*).*	Fails to apply **evaluation concepts** and/or **theories/ principles/guidelines** to the prototype effectively.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** inconsistently or inaccurately to the prototype.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** adequately to the prototype in familiar contexts.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** appropriately to the prototype.	Applies **evaluation concepts** and/or **theories/ principles/guidelines** effectively to the prototype.	
9. Application: Referencing Styles *(The action of putting ideas or solutions into operation to solve writing style section).*	Fails to apply **the stated referencing styles** effectively in the report.	Applies **the stated referencing styles** inconsistently or inaccurately in the report.	Applies **the stated referencing styles** adequately in the report.	Applies **the stated referencing styles** appropriately in the report.	Applies **the stated referencing styles correctly and** effectively in the report.

17. RUBRICS FOR EXHIBITION PRESENTATION – 10%

Name: **Matric Number:**

LOC3c: Communication Skills (Verbal) - 5% (Assessor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)	Total
Knowledge and Content *(Demonstrates understanding and familiarity with the subject matter)*	Demonstrates a lack of understanding of the subject matter. Content is irrelevant or inaccurate	Shows limited understanding of the subject matter, with significant gaps in knowledge or relevance. Content is quite relevant and accurate.	Demonstrates a basic understanding of the subject matter, but some key points or details may be lacking or unclear. Content is relevant, and accurate.	Shows a strong understanding of the subject matter. Content is very relevant and accurate.	Demonstrates exceptional knowledge of the subject matter. Content is very relevant and thoroughly accurate.	
Organization and Structure *(The ability to organize the presentation and present information logically)*	Information is very poorly organized with no clear structure or flow; very difficult to follow	Information is poorly organized, making it difficult to follow.	Information is somewhat organized but may have minor issues with flow and clarity	Information is well-organized with a mostly clear, logical flow; generally easy to follow	Information is excellently organized with a clear, logical flow; easy to follow.	
Clarity and Delivery *(The ability to communicate well and organise thoughts.* *Delivery: Demonstrates effective and engaging presentation of information)*	Communication is extremely unclear, making it nearly impossible for the audience to understand the message. Articulation, pacing, and projection are severely lacking.	Communication lacks clarity, making it challenging for the audience to follow the message. Articulation, pacing, or projection needs significant improvement.	Communicates ideas with some clarity, but improvements in articulation, pacing, or projection are needed.	Communicates ideas clearly and with good articulation, pacing, and projection.	Communicates ideas clearly and effectively, with excellent articulation, pacing, and projection.	
Engagement and Interaction	Fails to engage the audience effectively. No interaction,	Engagement with the audience is limited, and there's minimal	Engages the audience to a satisfactory extent but could improve in terms of	Engages the audience well and demonstrating enthusiasm. Encourages	Engages the audience effectively through enthusiasm, and	

(The ability to engage and interact with the audience)	hindering audience involvement.	interaction. Encouragement for questions and discussion is lacking.	enthusiasm, and interaction.	some questions and discussion.	interaction. Encourages questions and discussion, creating an interactive and dynamic environment.	
Expression *(Effective transmission of ideas, and intent through intonation, facial expression, body language, and eye contact)*	No variation in tone and pitch, resulting in a monotonous or unclear delivery of the message. Rarely uses gestures or body movements, contributing minimally or not at all to the message. Poor facial expression or no eye contact with the audience.	Limited variation in tone and pitch, affecting the conveyance of emotions and emphasis. Uses minimal gestures or body movements, lacking in supporting or enhancing the message. Inconsistent in facial expression or poor eye contact with the audience.	Adequate variation in tone and pitch, conveying emotions and emphasis reasonably well. Uses some gestures and body movements that complement the message but may occasionally be distracting or not fully supportive. Maintains facial expression and acceptable eye contact with the audience.	Demonstrates good variation in tone and pitch, effectively conveying the intended emotions and emphasis. Uses suitable gestures and body movements that complement the message. Maintains facial expression and consistent eye contact, generally enhancing audience engagement.	Exceptional variation in tone and pitch that enhances the meaning and engagement of the message. Uses a wide range of appropriate gestures and body movements that significantly augment the message without being distracting. Maintains excellent facial expression and eye contact throughout, enhancing audience engagement.	
Adaptability and Response to Feedback *(Ability to response and adapt to audience or unexpected situation)*	Fails to adapt to unexpected situations, feedback, or questions. Responses are inadequate or inappropriate.	Struggles to adapt to unexpected situations, feedback, and questions. Responses lack depth and critical thinking.	Demonstrates some ability to adapt to unexpected situations, feedback, and questions. Responses are generally appropriate but could be improved.	Adapts well to unexpected situations, feedback, and questions. Responses are appropriate and display critical thinking.	Demonstrates exceptional ability to adapt to unexpected situations, feedback, and questions. Responses are insightful and demonstrate critical thinking.

LOC3c: Communication Skills (Written/Poster) - 5% (Assessor)

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advance (4)	Total
Visual Appeal (*Aesthetic aspects of the poster, including its design, layout, colour scheme, and overall attractiveness*)	Very poor design, no effective use of color or graphics, unattractive, fails to capture attention.	Poor design, ineffective use of color and graphics, not aesthetically pleasing, struggles to capture attention.	Average design, some use of color and graphics, somewhat pleasing, captures attention to some extent.	Attractive design, good use of color and graphics, generally pleasing, captures attention well.	Highly attractive design, excellent use of color and graphics, aesthetically pleasing, captures attention effectively.	
Clarity and Organization *(The ability to clearly communicate and organize ideas, points, and information in writing)*	The information is unclear, disorganized, and difficult to understand.	The information lacks clarity and organization, making it challenging to follow. Significant improvements are needed.	The information is generally clear and organized, but some areas could be improved for better clarity or structure.	The information is clear and well-organized, with few minor issues in organization or clarity.	The information is exceptionally clear, well-organized, and easy to follow. Ideas are logically structured, and the content flows smoothly.	
Content and Relevance *(Writing's content, including facts, details, arguments, and evidence related are relevancy to the topic)*	The content is irrelevant, inaccurate, or lacks substance.	The content is relevant but lacks depth, accuracy, or relevance in some areas.	The content is mostly relevant but may contain some inaccuracies or gaps in information.	The content is relevant and generally well-researched, with some minor gaps or areas for improvement.	The content is highly relevant, well-researched, and provides valuable insights or information. It fully addresses the topic or purpose.	
Creativity and Originality *(The ability to generate unique ideas and how well the presentation stands out from others and captures the audience's interest)*	No creativity or originality; fails to engage the audience.	Lacks creativity and originality; does not engage the audience effectively.	Somewhat creative and original presentation; captures some interest.	Mostly creative and original presentation; engages the audience well.	Highly creative and original presentation; stands out and captures interest effectively.	
Language, Grammar, and Mechanics	Writing is extremely unclear and wordy, hindering comprehension.	Writing lacks clarity and conciseness, making it	Writing is generally clear but may be somewhat wordy or unclear in places.	Writing is clear and mostly concise, with only	Writing is exceptionally clear and concise, with no unnecessary words	

(The ability to choose and use words with proper rules, sentence structure, and technical writing aspects for effective writing)	The text is riddled with grammar and mechanical errors, severely impacting readability.	difficult to understand the intended message. Name: **Matric Number:**

LOC2: Cognitive Skills (Article/Book Chapter) -15%

Criteria	Not Available (0)	Below Basic (1)	Basic (2)	Proficient (3)	Advanced (4)	Total
Problem Identification (The process of recognizing and clearly defining an issue or challenge that needs to be addressed) (Introduction)	Fails to identify a clear research question or problem.	Identifies a problem, but it is vague or lacks specificity.	Identifies a problem, but it may have minor ambiguities or omissions.	Clearly identifies a well-defined research problem.	Identifies a complex research problem, contextualizes it within the broader field, and demonstrates a deep understanding of its significance.	
Application (in LR) (The practical use of theories, concepts, or methods to solve problems or achieve specific goals.)	Fails to apply concepts or theories to solve problems.	Applies concepts or theories inconsistently or inaccurately to solve problems.	Applies concepts or theories to solve basic problems in familiar contexts.	Applies concepts or theories appropriately to solve various problems in different contexts.	Applies concepts or theories creatively and effectively to solve complex problems in a variety of contexts.	
Methodology (The system of methods and procedures used in research or problem-solving.)	No methodology is described, or it is inappropriate.	Methodology is described but lacks rigor or clarity.	Methodology is generally appropriate but may have minor flaws.	Methodology is sound, appropriate, and well-explained, with appropriate data collection and analysis techniques.	Methodology is innovative and contributes to the advancement of the field, using advanced techniques or developing new methods.	
Analysis The careful examination and breakdown of information or data to understand a problem and examines relationships. (Results)	Lacks any analytical framework or fails to analyse the data.	Conducts limited analysis, focusing on superficial aspects of the data.	Conducts basic analysis, considering some relevant factors and relationships.	Conducts thorough analysis, considering most relevant factors and relationships.	Demonstrates sophisticated analysis, examining all relevant factors and identifying underlying issues.	

Decision-Making The act of choosing any action after evaluating different options or alternatives. (Discussion / Conclusion)	Fails to make meaningful decisions or conclusions.	Makes decisions or conclusions without adequate justification or evaluation.	Makes decisions or conclusions based on limited analysis of options.	Makes sound decisions based on thorough analysis of options and evaluation of alternatives.	Makes well-reasoned decisions based on a comprehensive analysis and evaluation of options.	
Citations and References (Acknowledges and gives credit to the work of others.)	No citations or references are used.	Citations and references are used, but they may be inaccurate or irrelevant.	Citations and references are used appropriately, but they may be limited in scope.	Citations and references are used effectively to support the argument and demonstrate a thorough understanding of the literature.	Citations and references are used creatively and innovatively to contribute to the field, with a diverse range of sources.	
Clarity and Coherence (Clarity: The quality of being easy to understand. Coherence: The logical and smooth flow of ideas in a consistent, connected manner.)	Lacks clarity and coherence, making the article difficult to understand.	Ideas are presented in a disorganized manner, with some inconsistencies.	Ideas are generally clear, but there may be minor inconsistencies or ambiguities.	Ideas are clearly presented and well-organized, with a logical flow.	Ideas are presented in a highly sophisticated and engaging manner, with exceptional clarity and coherence.	
Originality (The quality of being novel, creative, or unique, contributing new ideas or insights)	Does not contribute any new knowledge or perspectives.	Contributes limited new knowledge or perspectives.	Contributes some new knowledge or perspectives.	Contributes significant new knowledge or perspectives.	Contributes groundbreaking new knowledge or perspectives, challenging existing paradigms or developing innovative approaches.
